DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.

The prior art search did not disclose the reduction or increase of the encoding rate of individual layers of a first transmission medium in response to transmission or non-transmission of a datum of a second medium in accordance with a relationship of a latency of the second medium and quality of the first medium. The prior art discloses the encoding rate of the transmission medium is varied with the number of layers added or deleted to the transmission medium, but not the encoding rate of individual layers within the transmission medium.

Ammar (Patent number 6215766) teaches a receiver discontinues reception of a second layer (column 2 lines 23-27, column 3 lines 13-20) referenced by the receivers using experiments to add/drop enhancement layers to improve performance.

The prior art search did not disclose the response to transmission of datum of a pull medium results in discontinuing the reception of second layer datum of the push medium.
